**Machine Solutions Inc. Announces the Launch of
Disposable Transcatheter Heart Valve Crimping Tool**

Flagstaff, AZ USA, November, 2008 - Machine Solutions Inc.-

Machine Solutions Inc (MSI) announces the launch of the first fully disposable proprietary segmented compression mechanism for the percutaneous device industry. The MSI HV500™ Crimping Tool is injection molded and designed to precisely reduce the diameter of balloon expandable and self expanding transcatheter heart valves. This disposable tool has a large diameter range (2-50mm) which enables it to crimp a broad spectrum of devices. The crimping tool footprint is small enough for use in lab or bedside applications and can withstand multiple crimp cycles during one procedure. MSI also offers durable heart valve crimping equipment for use in research and development.

About Machine Solutions Inc.

Machine Solutions Inc. is a leading manufacturer and pioneer in providing the medical device community with the premier solution for catheter processing applications. MSI has been instrumental in automating or semi-automating several manual processes within catheter manufacturing organizations. Please visit www.machinesolutions.com for additional corporate and MSI product information.
